

Introduction to Web Technologies (HTML & CSS)

Create a general website with the following requirements:

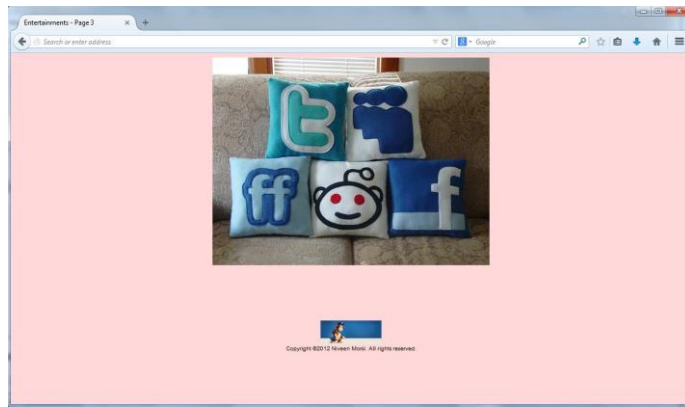

- The website should have at least 3 pages:
 - Home (Page 1)
 - This page should include an image that links to the main page (page 2)

- Main Page (Page 2)
 - In this page you should use:
 - Different heading (h1,h2,h3...h6)
 - Different formatting style (bold, underline, italic, coloring the texts...)
 - Use List
 - Top links to the top of the page

- Contact Us (Page 3)
 - The image at the top is an image map.
 - Each pillow area (in image map) should link to the corresponding website in another browser window.
 - The image at the end of the page is linkable to send an email to web owner.
 - Add your copyright reservation at the end.

- Use images if needed
- Create a single CSS file for all pages
